STRIPE PROJECT

Deliverables Checklist

> *Nicolas Pichon --- AIA RNCP 38777 / BC02 / Checklist / v01 --- 2026/11/05.*

D1. Comprehensive Data Architecture Diagram

A detailed diagram showing the integration of OLTP, OLAP, and NoSQL systems, including data flows, pipelines, and data models.

D2. ERD for OLTP System

An Entity-Relationship Diagram showing the normalized schema for the transactional system.

D3. Schema Design for OLAP System

A detailed schema design for the OLAP system, including star or snowflake schemas, aggregation strategies, and query optimization techniques.

D4. NoSQL Data Model

A detailed schema design for the NoSQL system, including strategies for managing unstructured data, relationships, and indexing.

D5. Data Pipeline Architecture

A technical document describing the data pipeline architecture, including tools, technologies, and processes for data integration and synchronization.

D6. Security and Compliance Plan

A detailed plan outlining the security measures, compliance strategies, and monitoring tools to be implemented across the data architecture.

D7. Machine Learning Integration Strategy

A document describing the integration of machine learning models within the NoSQL system, including feature extraction, model deployment, and performance monitoring.

D8. SQL and NoSQL Queries

A set of SQL and NoSQL queries demonstrating how key business questions (e.g., revenue analysis, fraud detection, customer segmentation) can be answered using the proposed data models.

Spécifications

- [D0] *Stripe Project Introduction*

Livrables

- [D1] *Comprehensive Data Architecture Diagram*
- [D2] *OLTP Entity-Relation Diagrams*
- [D3] *OLAP System Schema Design*
- [D4] *NoSQL Data Model*
- [D5] *Data Pipeline Architecture*
- [D6] *Security and Compliance Plan*
- [D7] *Machine Learning Integration Strategy*
- [D8-1] *SQL and NoSQL Queries : OLTP Queries*
- [D8-2] *SQL and NoSQL Queries : OLAP Queries*
- [D8-3] *SQL and NoSQL Queries : NoSQL Queries*

Annexes

- [D2-A] *OLPT Conceptual Data Model*
- [D2-B] *OLTP Physical Data Model*
- [D2-C] *OLTP Design Notes*
- [D2-D] *OLTP Replication, Failover and Disaster Recovery Strategy*
- [D3-A] *OLAP Kimball Analysis*
- [D3-B] *OLAP Physical Data Model*
- [D4-A] *NoSQL Supporting Notes*
